

Using Purple Mash at home

1. If your child cannot remember it, email the class teacher and ask for your child's username and password.
2. Using a web browser, such as Google Chrome, go to the school's Purple Mash web site at: <https://www.purplemash.com/sch/staugustinesdt4>
Or go to the Home Schooling page on the school's web site and click on the Purple Mash link.
3. Enter the username and password. The Purple Mash web site will remember the child's login name and the browser, if you want, will remember the password.
4. When the child logs in they will see this page (if they don't just click on Home).

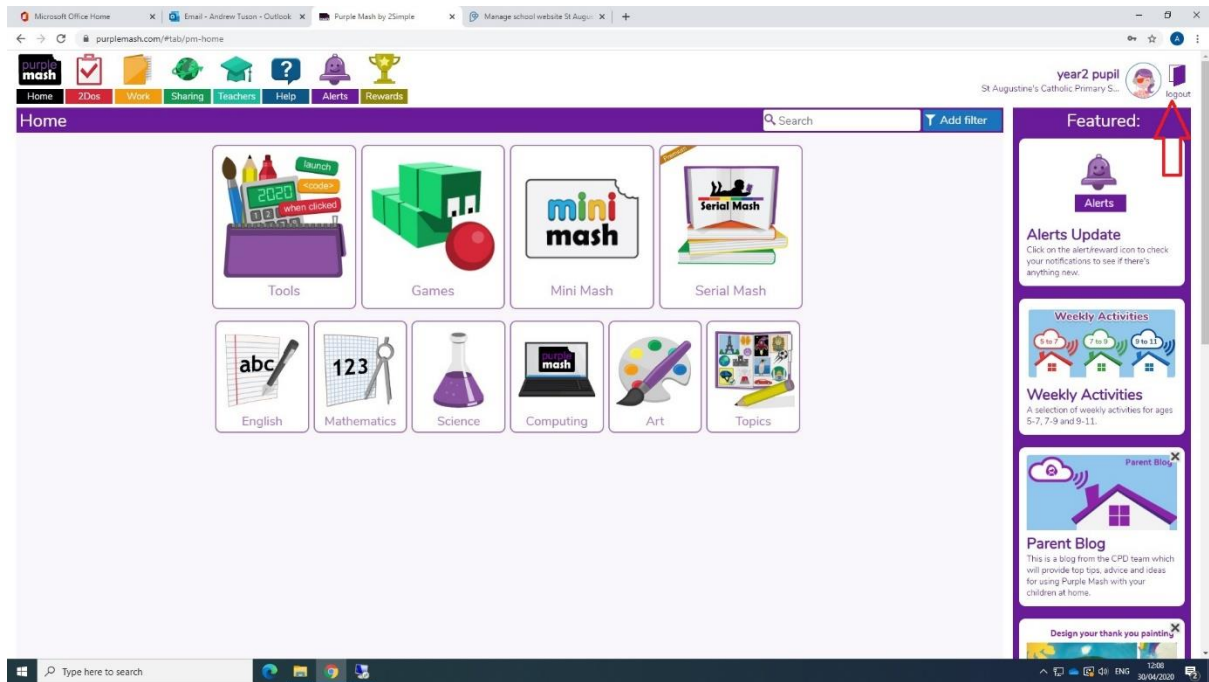

5. The child should then click on 2Dos (indicated on the picture) to see their current tasks, as on the next picture:

6. The icons beside the work will either be:
 - Start – a new task
 - Continue work – a task started, but not yet completed

- Hand In – hand in a completed task to the teacher

7. When the child has finished they click on the white back arrow on the red square (if needed) to get back to the home page, and then click on logout (as shown below).

8. The child can, if they wish, change their avatar next to the logout icon. They just click on the avatar and a window will pop up which enables them to draw their own face.
