RE WAGBAT: Reflecting further on the idea of hope

This activity can be completed over two lessons.

We have all found our lives changed by Coronavirus and whilst this has been challenging in many ways we have found ways to create hope, through being thankful, through sharing rainbows in our windows and through doing small acts of kindness for those around us. Have you ever considered how different our response to Coronavirus would be if we didn't even have access to soap and clean water? These clips look at how we have come together to create hope in challenging times, and how we have to look out further to our sisters and brothers overseas who are still struggling with this pandemic – we invite everyone to be part of creating a Summer of Hope that reaches out to all in need wherever they are in the world.

Create at **least one** piece of work that links to the idea of hope. It could be artwork, a prayer, a poem or a photograph. It may show:

- Your hopes for the planet
- Your hopes for our families
- Your hopes for our brothers and sisters of the world.
- Your hopes for next year.

Dear Mr Pilkington,

Greeting

I am writing to complain about the vegetables purchased from your shop three days ago.

Firstly, the potatoes which were not only hollow, but had an infestation of ants within them. Secondly, the 500g of mushrooms were actually doorknobs which had been painted grey. Last was the watermelon. Upon closer inspection this was no watermelon, rather a football painted green.

This standard is unacceptable and I demand a refund for these goods. You should expect a visit from myself within the week.

Yours sincerely
Mr. T. Smith

Maths - WAGBAT: Plotting coordinates in four quadrants.

Mark the co-ordinates below with a x and then join the points to see what is lurking there.

Co-ordinates

- | | | | | |
|-------------|-------------|--------------|-------------|------------|
| a. (14, 5) | f. (4, -2) | k. (-6, -7) | p. (-14, 1) | u. (0, 3) |
| b. (13, 2) | g. (3, -4) | l. (-8, -5) | q. (-12, 2) | v. (3, 2) |
| c. (12, 0) | h. (1, -3) | m. (-9, -2) | r. (-9, 3) | w. (9, 1) |
| d. (13, -3) | i. (-4, -3) | n. (-13, -1) | s. (-4, 3) | x. (14, 5) |
| e. (10, -1) | j. (-6, -2) | o. (-11, 0) | t. (-2, 7) | |

Join up your points in the correct order. Then create your own grid of four quadrants and use your own coordinates for a picture of your own design.
