Year 4 Homework: Week Beginning: 7.5.18

The overview of Maths works for this half term.

Decimals, pupils will learn about tenths and hundredths. They will learn how to count, order and record the decimals in different ways. They will begin to see equivalence between tenths and hundredths and will be able to compare and order the numbers. Pupils will learn to continue linear number sequences as well as round decimals to the nearest whole number. They will also link tenths and hundredths with dividing by 10 and 100.

Mass, Volume and Length, pupils will learn how to estimate and measure mass, volume and length. They will learn how to convert units of measure from larger to smaller and vice versa. Pupils will also be taught how to measure perimeter using centimetres and millimetres. They will use their knowledge of measures to solve problems involving all three aspects of measurement in this chapter.

Homework.

This weeks homework is to help the children show their understanding of shapes and their areas. Children will need to use a ruler or straight edge and a pencil to complete the torn shapes. *Drawing lines freehand is not acceptable.*

This week for English, I would like you to write a solution to your story problem. What's going to happen next? How will you solve it? Has this changed the character in any way? Can you add in any expanded noun phrases and interesting adjectives to your story to make it more interesting?

Ei/eigh/ey words

vein reign

weight foreign

weight eighteen

neighbourly obey

prey grey

Response to Homework

Please support your child with their homework by providing them with time and suitable place to complete it. We expect their homework to take 30-45 minutes and it should be completed relatively independently. The children will be tested again this week on the remaining timetables and results will be sent home next week.
