

Parents in Partnership

Year 4 Homework: Week Beginning: 30.4.18

The overview of Maths works for this half term.

Decimals, pupils will learn about tenths and hundredths. They will learn how to count, order and record the decimals in different ways. They will begin to see equivalence between tenths and hundredths and will be able to compare and order the numbers. Pupils will learn to continue linear number sequences as well as round decimals to the nearest whole number. They will also link tenths and hundredths with dividing by 10 and 100.

Mass, Volume and Length, pupils will learn how to estimate and measure mass, volume and length. They will learn how to convert units of measure from larger to smaller and vice versa. Pupils will also be taught how to measure perimeter using centimetres and millimetres. They will use their knowledge of measures to solve problems involving all three aspects of measurement in this chapter.

Homework.

We are about to begin a new topic looking at the area of objects. For the children's homework they will be exploring how different shapes can have the same area.

Our Topic this half term is Seas, Rivers and Water

This week we have been exploring the oceans of the world.

For English homework name the 5 oceans opposite and then create a list of different words that could be used to describe an ocean.

Extra house points for exciting or imaginative words!

Spellings this week words with 'y' in the middle.

Please learn how to spell these words for test on Mon. 7th May

myth rhyme

python hyphen

pyramid mystery

hygiene typhoon

dynamic hydrogen

Do you know what each word means?

Response to Homework

Please support your child with their homework by providing them with time and suitable place to complete it. We expect their homework to take 30-45 minutes and it should be completed relatively independently. The children will be tested again this week on the remaining timetables and results will be sent home next week.
